Oroville Dam Auxiliary Spillway Incident

On 05/08/17 at 0928 hours the California State Warning Center (CSWC) was advised by the Department of Water Resources (DWR) that they will begin the scheduled increase in flows to the Feather River on 05/10/17 at 0500 hours.

- Total flow will gradually increase from 7,750 cfs to approximately 30,000 cfs by 1130 hours.
- The Oroville Dam Flood Control Spillway flow will increase to 30,000 cfs.
- Hyatt Power Plant will be operated as needed to meet ramping and storage demands.

Per the DWR Flood Operations Center and California Data Exchange Center (CDEC) [as of 05/09/17 at 1800 hours](#):

- Inflow: [15,016](#) cfs.
- Outflow: [7,865](#) cfs.
- The current lake elevation is [848.43](#) feet.

Mission Tasking

- 2017-SOC-33363: Road Repair (Butte County) – On Scene.
- 2017-CalOES-34685: Asbestos Monitor (Butte County) – On Scene.

SITUATION SUMMARY

2017 February Storms

Cal OES Coastal Region

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.

Per the Cal OES Coastal Duty Officer (CDO), as of 04/27/17, Hwy 1 from the south is closed at Ragged Point and is open at specific intervals to local traffic only. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

Cal OES Inland Region

River Forecast - The following rivers are forecast to meet or exceed Flood stage:

Placer County:

- Truckee River at Truckee is forecast to be at flood stage at 4.5 feet on 05/10/17 at 2200 hours.
 - Potential Impacts: Flood Stage. Minor flooding from Bear Creek in the Alpine Meadows area to Truckee. Truckee River bike path between the River Ranch at Alpine Meadows Road to Tahoe City begins to flood. Basements and yards of some low-lying homes along the river begin to flood. Deep Creek Campground begins to flood. About 2270 cfs. USGS estimates this much flow has about a 1 in 4 chance of being exceeded any year.
- Merced River – Yosemite at Pohono Bridge is forecast to be at flood stage at 10.0 feet on 05/10/17 at 2200 hours.
 - Potential Impacts: Flood Stage. Western portion of North Pines Campground, located at the east end of Yosemite Valley between the confluence of the Merced River and Tenaya Creek, begins to flood. Water rises to the base of the swinging bridge downstream from Chapel Meadow.

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- Alpine County: West Fork Carson River at Woodfords, East Fork Carson River at Markleeville
- San Joaquin County: San Joaquin River at Vernalis
- Stanislaus County: Tuolumne River at Modesto
- Merced County: Merced River at Stevinson

WEATHER OF CONCERN

Weather of Concern

- The Merced River at Pohono Bridge in Yosemite National Park is expected to exceed flood stage early Wednesday morning and again on Thursday morning.
- An area of low pressure will sling moisture over the region today bringing showers and potentially a few thunderstorms to the mountains and deserts.

Active Weather Warnings, Watches and Advisories by County:

- http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php - Temporarily unavailable.
- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

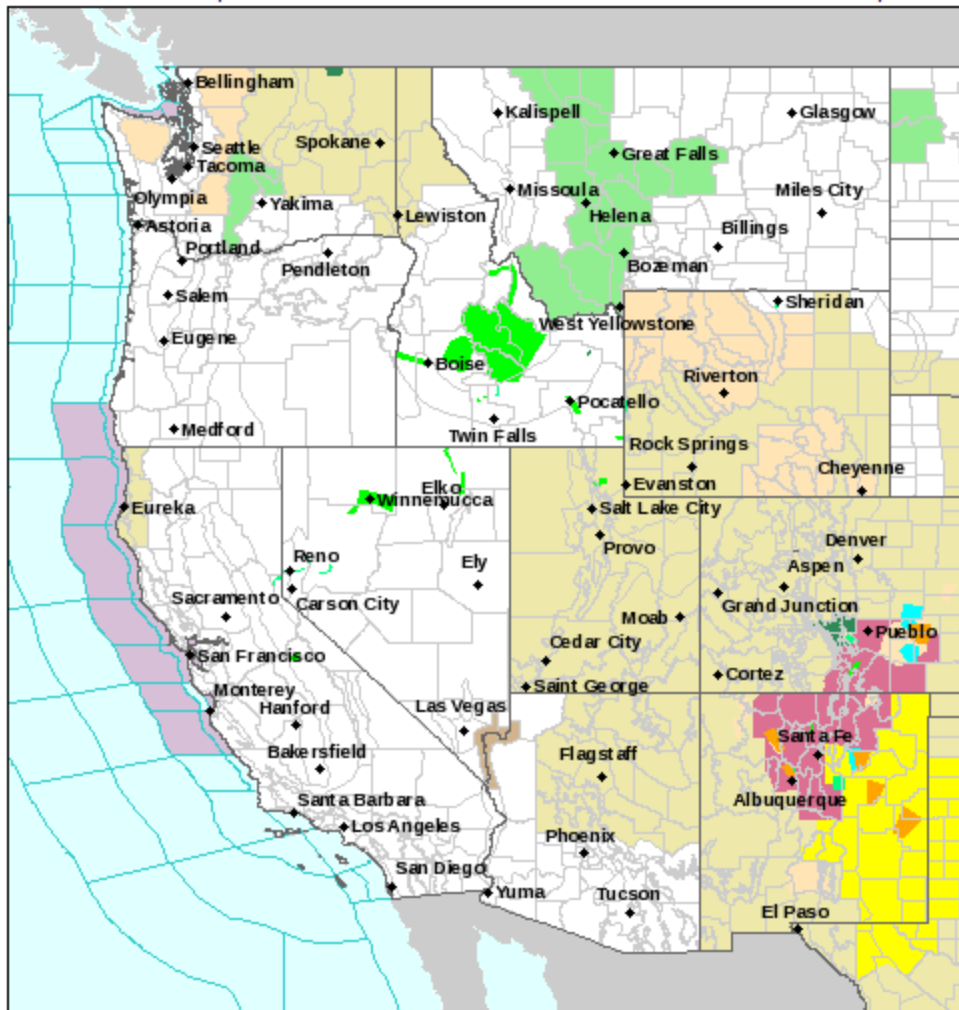

A high pressure ridge will hold over Northern California today for what should be the warmest day of the next 7 days. The warmest inland areas this afternoon will be in the lower 90s or about 15 degrees above normal. A low pressure trough approaching the coast will be moving ashore later Wednesday for the start of a cooling trend. Temperatures Thursday through Monday will be within a few degrees of 70 in the warmest inland areas or about 3-8 degrees below normal. A few light showers or isolated mountain thunderstorms could develop in the northern areas Wednesday afternoon and evening, but those events look more likely Thursday through Mother's Day (Sunday) across the northern and eastern mountains, although Saturday they may be limited to just the far northern areas. The closed-low core of the trough will be moving south off the Pacific Northwest coast over the weekend and may drop south over the Northern California early next week with a chance of more widespread wetting precipitation. However, there's also still quite a bit of uncertainty as to how those events will develop early next week. Winds Wednesday through the weekend will be southerly to westerly, of moderate speeds and gusty more often than not in the northeast quarter of Northern California in particular.

SOUTHERN CALIFORNIA

An area of low pressure over Northern Baja will move into Arizona bringing isolated showers and thunderstorms to the mountains and deserts through tonight. Showers will end across the region Wednesday as a weak ridge of high pressure builds into California from the Pacific. The ridge will peak in strength on Thursday. Temperatures will be near to a little below normal from the mountains westward due to continued onshore flow through Thursday. However, temperatures across the deserts will warm through Thursday as the ridge of high pressure builds inland and strengthens. Maximum temperatures will be in the 60s to low 70s across the mountains and mid 70s to mid 80s in the valleys through Thursday. A Pacific trough will bring a little cooling to the entire region Friday through early next week. This trough will also bring westerly winds of 20 to 30 mph with gusts to 50 mph to the wind prone mountain and desert areas Thursday afternoon through early next week. Minimum humidity will remain mainly above 30% through early next week.

Cal OES LAW ENFORCEMENT MISSIONS

Closed Cal OES Law Missions

- **2017-LAW-35695, 05/08/17, 0805 hours:** Contra Costa County Sheriff's Office requested two trailing dogs and two area search dogs for immediate deployment in support of the search for a missing 70 year old female. The subject suffers from dementia and wandered away from her home on 05/07/17 at approximately 1900 hours. The subject lives adjacent to the Wildcat Canyon Regional Park, near Richmond. The search area included the area surrounding her residence and parts of the park. The Cal OES Canine Coordinator tasked one area dog and two trailing dogs for the mission. As the dog teams were arriving on scene, the subject was located alive and well in the residential area near her home. All Mutual Aid resources were cancelled. **Mission Closed.**
- **2017-LAW-35709, 05/08/17, 1028 hours:** The Air Force Rescue Coordination Center (AFRCC) reported an Emergency Locator Transmitter (ELT) activation in Napa County, near Lake Berryessa. The California State Warning Center (CSWC) contacted the Cal OES Law Enforcement Duty Officer (LDO) and the Napa County Sheriff's Office, who advised that they were at the scene of an airplane crash, with two deceased, in the same general area. The crash site plotted approximately 1/3 mile from the location of the ELT provided by the AFRCC. Napa County was able to confirm the plane involved in the crash was the missing aircraft based on tail numbers. AFRCC was updated. **Mission Closed.**

Cal OES MISSIONS

Cal OES Missions

- **2016-IREOC-21748:** Tasking Caltrans to extend state highway right of way to facilitate hazard tree removal. This is a long term mission and is expected to remain in place through the summer months. **Mission Ongoing.**
- **2015-IREOC-19846:** One RAWS weather station to Amador OA – On scene 11/30/15, expected to be left in place until May 2017. **Mission Ongoing.**

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
